EDUCATION

Indian Institute of Information Technology, Gwalior
Integrated B.Tech in Information Technology + MBA | CGPA: 8.23

Madhya Pradesh, India
Expected May 2028

EXPERIENCE

Trackt August 2025 – October 2025
Flutter Developer Remote

- Architected and deployed a **location-based territory conquest gaming app** (Flutter + Supabase) serving **100+ active beta users** with real-time GPS tracking and competitive territory mechanics.
- Engineered **PostGIS spatial algorithms** for territory conquest and merging, enabling real-time processing of **5,000+ territories** with sub-second query performance via spatial indexing and territory auto-merging.
- Enhanced GPS tracking accuracy through **platform-specific native implementations** (Android wake locks, iOS background location, Samsung power optimizations), improving location precision by **20%**.

Go Extra Mile September 2025
App Developer Intern Remote

- Improved a **reward-based travel tracking app** (5,000+ downloads) — redesigned **Firestore schema** cutting reads/writes by **50%** and eliminated redundant **Google Maps API** calls via a **compressed coordinate algorithm**, significantly reducing Firebase costs.
- Proposed **Riverpod** state management migration and streamlined path storage, improving performance and maintainability.

Meta SciFor Technologies August 2024 – September 2024
Flutter Developer Intern, Team Lead Remote

- Led a team of 6 interns**, delivering **4 sprint releases** on schedule; integrated real-time **QR ticketing** via Django REST APIs as top committer (**30+ commits**), reducing scan latency by **40%**.

OPEN SOURCE CONTRIBUTIONS

Palisadoes Foundation — Talawa | Flutter, Dart GitHub

- Merged **12+ pull requests** spanning code health, performance, and infrastructure; led **Flutter SDK upgrade to 3.5.0** by manually resolving complex analyzer dependency conflicts that were blocking the migration.
- Achieved **100% test coverage** on core components (`CachedUserAction`, profile pages); refactored org feed to **ListView.builder** for improved scroll performance and added **screenshot blocking** on Android auth screens.

PROJECTS

WalletGo | Go, Flutter, MongoDB, Docker, REST APIs GitHub

- Built a **Fampay-style wallet app** with a **Go backend** and **Flutter** frontend supporting cross-platform transactions, contact-based discovery, bill-splitting, and real-time balance updates via **Dockerized deployment**.
- Implemented **OTP authentication** and parental controls; optimized **MongoDB** queries with clean architecture and **Provider** state management.

TECHNICAL SKILLS

Languages: Go, Python, C++, Dart, JavaScript, SQL
Mobile & Backend: Flutter, Node.js, Express.js, REST APIs, GetX, Provider, Riverpod, Django
Databases: PostgreSQL, MongoDB, Firestore, PostGIS
Tools: Git, GitHub, Linux, Docker, Postman, GitHub Actions, Firebase, Supabase
Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOP

ACHIEVEMENTS

- Won **Monad Blitz Delhi 2026** — delivered a high-impact technical project under a 6-hour sprint hackathon, competing against teams from across India.
- Achieved **LeetCode Knight** (top **5.4%** globally, rating **1850+**); top contest ranks: **1,125/30,797** (Biweekly 152) and **1,089/22,518** (Biweekly 144).
- Rated **Pupil on Codeforces** and **3-Star on CodeChef**, reflecting consistent competitive programming performance across platforms.
- Won 1st place at **Kaun Banega Entrepreneur** – flagship entrepreneurship competition by **E-Cell, IIITM Gwalior**.
- Led **Flutter Festival, GDG Gwalior** (workshop for **100+ students**); **Core Team Member** at Infotsav & Aurora, coordinating for **500+ participants**.
