## EDUCATION

**Indian Institute of Information Technology, Gwalior**  
*Integrated B.Tech in Information Technology + MBA | CGPA: 8.23*

Madhya Pradesh, India  
*Expected May 2028*

## EXPERIENCE

### AVEVA

June 2026 – Present

*Software Development Engineer Intern*

*Hyderabad, India*

- Working on the **Gateways** data ingestion pipeline that parses multi-format engineering inputs (XML, Excel, DOC, etc.) and transforms them into **SVG simulations** and **AIM database** outputs for 1D, 2D, and 3D industrial design workflows.
- Collaborating within an **Agile/Scrum** development environment — participating in sprint planning, daily standups, and design reviews within the **Interop Product Development** team.

### Google Summer of Code 2026 | LibreHealth

May 2026 – Present

*Flutter Developer — NeoRoo Cross-Platform Maternal Health App*

*Remote*

- Designed a **cross-platform** Android and iOS **DHIS2 sync engine** for a Flutter mobile health app using **Pigeon** type-safe bridge generation, eliminating runtime crashes from untyped MethodChannels; integrated **DHIS2 d2 SDK** with bidirectional sync — auth, metadata download, and tracked entity push/pull.
- Built an **offline-first SQLite sync queue** with exponential backoff retry and connectivity-aware auto-flush; implemented iOS parity via **Swift + URLSession** with native background sync using **WorkManager (Android)** and **BGTaskScheduler (iOS)**, achieving reliable offline data for rural clinics.

### Summer of Bitcoin 2026 | Stable Channels

May 2026 – Present

*Android Developer — BTC/USD Self-Custodial Lightning Wallet*

*Remote*

- Delivered **15+ merged PRs** to a **Jetpack Compose** Android Lightning wallet; built an **FCM push notification** pipeline that boots the LDK node, fetches median BTC/USD from 5 independent feeds, and executes keysend payments to maintain the dollar peg when the app is closed.
- Implemented **biometric authentication** with **Android Keystore AES-256-GCM** seed-phrase encryption and **CameraX + ML Kit** QR scanner; hardened background service with gossip data stripping (**8MB+ memory reduction**) and resolved critical production bugs.

## PROJECTS

**Trackt** | Flutter, Supabase, PostGIS, Dart | Freelance

GitHub

- Architected a **cross-platform** Android and iOS **territory conquest gaming app** (Flutter + Supabase) serving **100+ active beta users** with real-time GPS tracking and **GetX** reactive state management.
- Engineered **PostGIS spatial algorithms** processing **5,000+ dynamic territories** with sub-second performance; improved GPS precision by **20%** via platform-specific native implementations (Android wake locks, iOS background location).

## TECHNICAL SKILLS

**Languages:** Go, Python, C++, Dart, Kotlin, Swift, JavaScript, SQL

**Mobile & Backend:** Flutter, Android, iOS, Jetpack Compose, Node.js, Express.js, Django, REST APIs, GetX, Provider, BLoC, Riverpod

**Databases:** PostgreSQL, MongoDB, Firestore, PostGIS, SQLite

**Tools:** Git, GitHub, Docker, Firebase, Supabase, GitHub Actions, Postman, Linux, Agile/Scrum

**Coursework:** Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOP

## ACHIEVEMENTS

- Won **Monad Blitz Delhi 2026** — delivered a high-impact technical project under a 6-hour sprint hackathon, competing against teams from across India.
- Achieved **LeetCode Knight** (top **5.4%** globally, rating **1850+**); top contest ranks: **1,125/30,797** (Biweekly 152) and **1,089/22,518** (Biweekly 144).
- Rated **Pupil on Codeforces** and **3-Star on CodeChef**, reflecting consistent competitive programming performance across platforms.
- Led **Flutter Festival, GDG Gwalior** (workshop for **100+ students**); **Core Team Member** at Infotsav & Aurora, coordinating for **500+ participants**.
